

Project Overview

The Nevada Department of Transportation is evaluating long-term solutions for I-515/U.S. 95, between Rancho Drive and Mojave Road, to address the aging infrastructure, safety, and congestion to increase efficiency of the movement of people, goods, and services while revitalizing and reconnecting the community.

Project Elements

- » Fix closely spaced ramps through downtown by adding a collector-distributor road adjacent to the freeway in both directions
- » Add one general purpose lane and one High Occupancy Vehicle (HOV) lane in each direction
- » Improve bike and pedestrian mobility in the area
- » Build community space (collaboration between the City of Las Vegas and the community)
- » Add new landscape and aesthetics
